## Xinger,

## Ultra Low Profile 0805 Power Divider $50 \Omega$ to $50 \Omega$

## Description

The PD4859J5050S2HF is a low profile, sub-miniature Wilkinson power divider in an easy to use surface mount package. The PD4859J5050S2HF is ideal for high volume manufacturing and delivers higher performances than traditional printed and lumped element solutions. The PD4859J5050S2HF is matched to $50 \Omega$ and has a height profile of 0.5 mm which is ideal for high level integrations in the following markets: 802.11a, WiMax, and home cordless. The PD4859J5050S2HF does not include the resistive element and therefore, requires an external resistor for operation. The PD4859J5050S2HF is available on tape and reel for high volume manufacturing pick and place.

Detailed Electrical Specifications: Specifications subject to change without notice.

| Features: | Parameter | ROOM ( $25^{\circ} \mathrm{C}$ ) |  |  | Unit |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Min. | Typ. | Max |  |
| - $4800-5900 \mathrm{MHz}$ | Frequency | 4800 |  | 5900 | MHz |
| - 18 dB Isolation (output ports) | Input Port Impedance |  | 50 |  | $\Omega$ |
| 0.5 mm Height Profile | Output Port Impedance |  | 50 |  | $\Omega$ |
| - 50 Ohm Input / 50』 Outputs | Return Loss | 7.9 | 10.3 |  | dB |
| - Low Insertion Loss | Insertion Loss* |  | 0.7 | 1.0 | dB |
| - Surface Mountable | Amplitude Balance |  | 0.1 | 0.3 | dB |
| - Tape \& Reel | Phase Balance |  | 1 | 4 | Degrees |
| - Non-conductive Surface <br> - RoHS Compliant | Isolation (Output Ports) | 14 | 18 |  | dB |
| - External Resistor Required <br> - Halogen Free | Power Handling | -55 |  | 2 +85 | Watts ${ }^{\circ} \mathrm{C}$ |

* Insertion Loss stated at room temperature (Insertion Loss is approximately 0.1 dB higher at $+85^{\circ} \mathrm{C}$ )

Outline Drawing

Typical Broadband Performance: 500 MHz . to 8.0 GHz .

Amplitude Balance

Phase Balance

## Typical Performance: $\mathbf{4 7 0 0} \mathbf{~ M H z}$. to 6000 MHz.

## Mounting Configuration:

In order for Xinger surface mount components to work optimally, the proper impedance transmission lines must be used to connect to the RF ports. If this condition is not satisfied, insertion loss, Isolation and VSWR may not meet published specifications.

An example of the PCB footprint used in the testing of these parts is shown below. In specific designs, the transmission line widths need to be adjusted to the unique dielectric coefficients and thicknesses as well as varying pick and place equipment tolerances. In addition, since the PD4859J5050S2HF is a Wilkinson power divider, an external $0603100 \Omega$ resistor must be mounted in locations R1 as shown in the Figure below.

All of the Xinger components are constructed from ceramic filled PTFE composites which possess excellent electrical and mechanical stability having X and Y thermal coefficient of expansion (CTE) of $17 \mathrm{ppm} /{ }^{\circ} \mathrm{C}$.

## Packaging and Ordering Information

Parts are available in reels and are packaged per EIA 481-2. Parts are oriented in tape and reel as shown below. Minimum order quantities are 4000 per reel.
